Blood Glucose & Uric Acid Monitoring System

SPECIFICATION

Sample type : Capillary or venous whole blood

Sample volume : blood glucose 0.6 μ L, uric acid 3 μ L

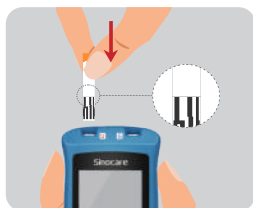

Calibration : Plasma equivalent

Measuring range : Blood glucose 20-600mg/dL
or 1.1-33.3mmol/L, uric acid
3.0-20.0mg/dL or 181-1188 μ mol/L

Test time : Blood glucose 5 $\pm$ 1seconds,
uric acid 25 $\pm$ 1seconds

Memory capacity : Blood glucose 500 test results and 100 control solution
with date and time, uric acid 100 test results and 100
control solution with date and time

Battery life : 1000 tests

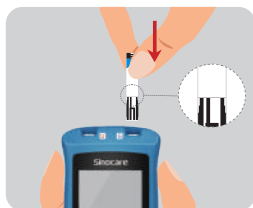

① Insert uric acid test strip

② Apply the blood sample

③ Result will be displayed in 25 seconds

① Insert blood glucose test strip

② Apply the blood sample

③ Result will be displayed in 5 seconds
